

## Now Serving...

**Challenge:** Your TASK is to communicate non-verbally with you team members to sort yourself in numerical order.

**Time:** You will have 1 minute to verbally discuss how you will solve this problem. You will then be given a number. You will then have 2 minutes to line up in numerical order from left (lowest) to right (highest). During the second part of this problem you may not speak or pantomime speech (lips moving without sound).

**Set-up:** On the floor is a line to follow.

**Procedure:**

Part one (1 minute): Discuss how you will sort yourselves into numerical order.

Between part one and part two each team member will be given a number on an index card. You may not show your card to other team members. The appraiser will announce "Begin" to start part two.

Part two (2 minutes): Without speaking or pantomiming speech, sort yourselves into numerical order.

**Scoring:** You will receive

- A. Ten points for every team member that is numerically higher than all members to his left (max 60).
- B. Up to 20 points for how well your team works together.

**NOTE:** This problem is usually performed with all team members blind folded for part two.
